M.D. BATTLE RIVER COUNCIL MINUTES

Councillors of the Municipal District of Battle River No. 423 met in Council room with all members present.

Minutes of last meeting were read and on motion of Mr. Santee were accepted as read.

Moved by Mr. Smallwood that report of Mr. Dietrich on W. Half of 26-46-7 be accepted. Cd.

Moved by Mr. Santee that Council accept orders of Andy Hyatt for \$63, Chas. Goodrich for \$42.00, and P. Shipley for \$61.25 and that Secretary be authorized to pay to parties to whom orders are made payable. Cd.

Moved by Mr. Smallwood that report of Provincial Inspector be accepted. Cd.

Moved by Mr. Santee that Secretary notify A. K. Price that Council have no authority to lower his assessment at the present time. Cd.

Moved by Mr. Dietrich that correspondence of S. Wilcox be tabled to be investigated by Mr. Burrell. Cd.

Moved by Mr. Smallwood that accounts of E. E. Sharkey for \$30.00 be paid when passed by cemetery committee. Cd.

Moved by Mr. Santee that the following accounts be passed and paid:
W. A. Burton—Telegram \$ 80
R. J. Tate—Salary \$425.00
Sam Trochu—Labor \$20.00
C. E. Penton—Labor 3.00
Irma Hardware—Repairs 31.00
Land Titles Office—Survey 8.00
Irma Motors—Lights 1.50
Ed. Huffman—Labor 72.00
C. E. Penton—Labor 40.00
Farmers Mutual Lbr. Co.—Material 12.25
J. D. Adams & Co.—Repairs 3.40
Albert Olson—Repairs 5.10
Canada Ingot Iron Co.—Culverts 24.20
R. J. Tate—Express 1.10
Irma Times—Papers 24.00
E. Carlier—Labor 17.50
Western Mun. News—Supplies 12.25
Albert Olson—Repairs 255.00
Richardson Rd. Mach. Co.—Repairs 20.65

Moved by Mr. Smallwood that time sheets of H. E. Mabey for \$733.25 and \$480.50 be passed subject to signature of road foreman. Cd.

Moved by Mr. Burrell that the following time sheets be passed:
W. Goodwin \$3.00
Ditto \$210.00
Ditto \$383.50
Ditto \$255.00
Ditto \$230.95
Ditto \$327.50
Ditto 16.75
Ed Huffman \$15.75
Carl Larson \$343.00
Ditto \$341.50
W. Myers \$114.25
Ditto \$222.12
Ditto \$260.00
Ditto \$499.70
J. H. Lennon \$307.00
Ditto \$342.00
Ditto \$325.00
Ditto \$368.50
Ditto \$257.50
Ditto \$190.50
Ditto \$418.00
Ditto \$346.00
Carried.

Moved by Mr. Smallwood that this Municipality grant Wainwright Agricultural Society \$25.00 and Irma Agricultural Society \$50.00. Cd.

Moved by Mr. Burrell that Council adjourn. Cd.

JARROW
Mr. Clayton Reese, an old settler living southeast of Jarrow had a stroke Tuesday of last week from which he passed away in the Viking Hospital on Friday. Mr. Reese was a single man and as far as known had no relatives in the west.

His mother and uncle came out from New York to attend the funeral which was held at Viking on Thursday afternoon.

ANOTHER GAS WELL IN THE VIKING FIELD
Another gas well was brought in in the Viking field on Thursday afternoon by the Hudson Bay Marland Oil Co. with a flow of 9,700,000 cubic feet per day. The gas will be shut off for the time being so that the drillers can continue in their search for oil which is believed to exist at or near the 4000 ft. level in this field.

FROST LOSS ESTIMATE 10 p.c.

Broken weather during the first two weeks in August retarded the ripening of crops and delayed harvesting a few days. The warm weather of the past few days has, however, been beneficial in drying the grain for cutting, and in ripening the late grains, and cutting is now general over the entire province. The Peace River Country reports 75 per cent. of cutting done and threshing expected to be general by next week. Central and southern parts of the province report 25 to 30 per cent. of cutting done. Very little threshing has been done in the province to date, and no estimate can be made at the present time of the yield of the different grains. We do not anticipate, however, any increase in total yield of wheat over that of 1927. The quality of the grain being harvested throughout the province is good.

Frosts have occurred in almost all parts of the province but these have been confined to small areas and the average percentage of damage from frost for the province will be small, not more than 10 per cent. at most. Hail damage has been heavy also in a few districts but the average for the province will be less than last year. The percentage is estimated to be approximately 14 per cent. of the insured acreage as against 17 per cent last year. The crop in general has been singularly free from disease and insect pests.

Labor appears to be plentiful throughout the province, wages running from \$3.50 to \$5.00 per day. Swathing machines and combines are being used more generally in the province than was the case last year and harvesting should go forward rapidly.

The acreage sown to wheat will be less than estimated at the beginning of the season owing to the dry weather at wheat seeding time. This land, however, was sown to coarse grains and the total acreage of the province is approximately the same as estimated.

The best crop of Southern Alberta is progressing well and promises a good yield per acre.

**CHURCH NOTICES
AND ACTIVITIES**

Mr. Levitt will be the speaker next Sunday in the absence of Rev. Wright who is to preach anniversary services at Fort Saskatchewan.

Strawberry Plains—11 A.M.
Alma Mater—3 P.M.
Irma—8 P.M.
Rev. Wright and Mr. Thorpe attended the Presbytery meeting in Kinsella Tuesday and Wednesday. Rev. McNeil was inducted at a special service Tuesday evening.

Rally Day programs have arrived for September 30th. Our aim is to double the usual attendance on that day, and recognition on Rally Day will be given the scholars who bring others each of the three Sundays intervening. Work brings results. Every scholar should cut out the words of this "Booster" hymn and memorize them:

"Work for the day is coming,
When we each bring one more;
Work make our numbers double,
What they have been before.
Work 'mong our friends and neighbors
Work while the goal still beckons,
Work till you've done your part."
The Attendance Honor Roll for August is as follows:

Beginners' Class—Edna Schonert, and Evelyn Elford.
Primary Class—Clarence Carter, Marion Thorpe, Orville Wright.
Junior Class—None.
Intermediate Boys—Ray Locke, Ralph Schonert, Frank Maguire, Morris Wright.
Intermediate Girls—None.
Adult Class—None.

The Calgary Power Co. have completed the erection of poles for transporting the power line to Irma and for wiring the town. The wire has been strung and a transformer station and men are busy stringing wire through town. It looks as if Irma would soon be supplied with plenty of electricity for its present and future use.

REVIEW OF THE MARKETS

BEEF—Edmonton market this week has shown signs of an improvement, with butcher cattle in a better demand. Choice heavy steers are selling at \$9 @ \$10, and a few going higher; this range covers both light and heavy cattle. Good heifers are bringing \$8 @ \$8.50.

FEEDERS, STOCKERS—Feeder steers are bringing \$8 @ \$8.50, the good stocker cows and heifers \$5.50 @ \$7.

HOGS—Receipts at Edmonton were too light to establish a market. Last sale of thick smooths, off feed, were \$13.10.

SHEEP—At Edmonton the sheep market is little changed. Good lambs are quoted at \$10.50 @ \$11.50, yearlings \$8 @ \$8.50, ewes \$6 @ \$6.50.

POULTRY—Demand excellent for heavier fowls with prices for these somewhat better. Market is still overstocked with light broiler types.

HAY—Market dull and receipts light. Quality continues well above average of other years. Baled upland hay is bringing very little more than loose new hay, as there are considerable stocks of baled hay of last year's crop. A large proportion of the hay crop in Alberta is still uncut.

FEED OATS—Last of 1927 crop now being marketed; prices unchanged with light receipts.

FURS—Winnipeg fur auction prices lower on nearly all western pelts: Muskrats 75c @ \$1; coyote \$5 @ \$15; badger \$10 @ \$15; weasel 75c @ \$1.75; mink \$30 @ \$12. Fancy fox skins only ones to show firm tone. Seattle sale at the same time was also lower.

WOOL—Most of the clip now out of growers' hands. Sydney sale opened lower.

HIDES—Tanners will not bid up to prices asked by hide buyers and market very slow. No change in prices, but unless action comes soon, decline is very probable.

DUCK SHOOTING SEASON
The opening date for the shooting of ducks, geese, coots and Wilson's or Jack-snipe in this province south of the Clearwater and Athabasca Rivers for this season has been set for Saturday, September 15th. North of the Clearwater and Athabasca Rivers the season opens on September 1st. The closing date is December 14th.

The daily bag limit is as follows: Ducks, 30 per day and not more than 200 of all kinds in the season; geese, 15; coots, 25; snipe, 25.

There is a closed season on all other migratory, non-game and insectivorous birds. There is also a closed season on this year on partridge and prairie chicken.

The open season for Hungarian partridge is from October 1st to November 30th. The bag limit is 15 per day and 75 per season.

**NOTICE TO ADVERTISERS
AND SUBSCRIBERS**
On account of the annual convention of the Alberta Press Association, (division of Canadian Weekly Newspapers Association) being held at Lethbridge on Sep. 13-14th there will be no Irma Times issued for Friday, Sep. 14th as the publisher is going to attend. Advertisements and notices should be sent to appear in issue of September 7th.

Mr. Hugh Dick of Hyndford Station, Ontario, spent a few days visiting at the home of Mr. and Mrs. Lennon in Irma. Mr. Dick while here disposed of his quarter section of land which he script in the Roseberry district some eighteen years ago.

STATEMENT FROM WHEAT POOL

The Central Selling Agency issued an official statement August 27th by E. B. Ramsay, Secretary and Manager, announcing that the initial payment for the 1928-29 crop will be 85 cents a bushel, basis No. 1 Northern, at Fort William and Vancouver.

"The Wheat Pool Board in taking this step is following the same consistent policy pursued from the formation of the pool," Mr. Ramsay stated.

"The initial payment made by the Albert Pool when it began operations in 1923 was 75 cents per bushel. The initial payment for four subsequent years was \$1.00 a bushel. The initial payment has always been based upon market conditions at the opening of the crop year and bears no relation to the price per bushel ultimately received by the Pool members.

OLD CROP SOLD OUT
"We are starting the new crop year practically sold out. The rumours which have been circulated during the past summer in respect to the large stocks of wheat held by the Pool are therefore refuted.

"The recent Pool interim payment which brought the payment already made to our members for the last year's crop up to \$1.40 per bushel, basis No. 1 Northern at Fort William and Vancouver, should have made any reference to such rumours unnecessary. The endorsement of the Pool by the great majority of grain growing farmers of Western Canada who have signed up for another five year term is sufficient proof that the faith of our members in orderly marketing has not been shaken."

QUESTION OF GOOD BUSINESS
The above statement is self-explanatory. The drastic drop in wheat prices has resulted in a decision to lower the initial Pool price. It is a question of sound judgment and good business. There need be no occasion for alarm among Pool members. On the contrary members may feel fortunate that their organization is operating this crop year.

The first duty of the Wheat Pool directors is to see to the safety of the organization. That is the prime motive behind the reduction of the initial price. The directors are entrusted with a vast responsibility. They dare not take any stand that would endanger the Wheat Pool. Thoughtful and reasonable Pool members will at once realize the soundness of the position taken by those into whose care the Pool is entrusted.

"The probability is that the enemies of the Wheat Pool will at once commence an attack on the organization. In the past members have stood by their guns and refused to be stampeded. They will be well advised to continue to resist anti-pool propaganda at this time. The crop year has only begun. The harvest of 1928 has not been marketed as yet!

The combination of events which has resulted in rapidly falling wheat prices can in no way be attributed to the Wheat Pool. The Pool wheat from the 1927 crop was sold efficiently. The Pool carryover was a nominal one. It was the non-pool carryover of Canadian wheat that caused a great deal of the damage.

A POLICY OF SAFETY
The Wheat Pool has never guaranteed an initial payment, or a final payment. Neither has the Pool ever claimed it could fix the price of wheat at a given point. These statements are well-known facts. What the Pool does guarantee is that the members receive a fair average price covering a year's operations. Without a Wheat Pool the farmers of Western Canada would be in a far more serious situation right now. They would be faced with the necessity of dumping a large crop on a surfeited market over which the 'bearish' element has gained a nominal control. With the Pool functioning the farmers may have hope and confidence.

While the Wheat Pool directors very naturally would have preferred to have retained the initial payment at the \$1.00 figure as originally announced, they followed a policy outlined by safety and good business principles in reducing the amount. They are custodians of the property and interests of Pool members and as such, are guided by a policy founded on common-sense.

SMOOTHER
with New Refinements..
and enhanced in Style
and Beauty

DURING its thirty months before the public, the Pontiac Six has earned a world wide reputation for combining six-cylinder smoothness and high-speed endurance like no other car in its field. Now, because of recent engineering advancements, to-day's Pontiac Six offers even greater smoothness and more satisfying performance than ever before.

To Pontiac's thoroughly proved design—to its Lovejoy Shock Absorbers, its 186 cu. in. engine and generously over-sized vital units—to its numerous engineering advancements, such as the G.M.R. cylinder head—Pontiac has added new Marvel carburetor, improved manifold and new distributor.

Now this lowest priced General Motors Six provides a combination of quality features never before offered in a car of comparable price. In addition, the outstanding beauty of Pontiac's "body by Fisher" has been enhanced by new, smaller wheels and larger tires.

Newly refined and improved—today's Pontiac Six is more clearly than ever the value leader of its field. Drive it—and discover this truth for yourself!

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easy.

Where Co-operation Is Needed

The movement of ten thousand unemployed British miners to Canada to work as harvest hands in the grain fields of the West is so significant, and may have such far-reaching results, that it warrants additional consideration to that already given in a previous article in this column.

Suppose the situation was reversed and there was a surplus of tens of thousands of farmers' sons and farm hands in Western Canada who could not find employment, while, on the other hand, there was a shortage of miners in the coal-mining districts of the British Isles, and the experiment was tried of transporting an army of men from the grain fields of the West to the mines of Britain.

Under such circumstances the sympathy of the people of Canada would go out to their sons as they journeyed to an unfamiliar country to engage in work of which they had no knowledge or training, and to live under conditions entirely new to them. There would be hope in the hearts of the relatives and friends of those men that the British people and the mine bosses would be considerate in their treatment, lenient in their judgments, sympathetic and patient in assisting the strangers to adjust themselves to their own environment and make good.

Fortunately for Canada his sons do not have to go abroad in order to find work and opportunity, because nowhere in the world today is work more plentiful, nowhere do greater opportunities present themselves than in Canada. This very fact should, however, not provide a greater incentive to our people to extend a heartening welcome and a helping hand to these British miners.

Judging by numerous statements made by these men, the vast majority of them have come to Canada with the right spirit—a real determination to "make good" and achieve not merely a temporary but a permanent success in this country. They come wholly inexperienced in the work they are to undertake. Instead of working eight hours a day, they will be required to work from early dawn till dark, but the spirit of the men was expressed by one of them on the eve of sailing when he said that eighteen hours at work in the open fields and fresh air of the prairies would not be any worse than eight hours under ground in a coal mine.

Enroute over the ocean, the first group of miners were taken back to the British Government that they were determined to succeed, and at the port of landing in Canada, and again at Winnipeg, Regina, Moose Jaw, and other points of distribution, men after man expressed the same view, namely, that they were anxious to make a success in Canada and were hopeful of securing "work after the harvest" and becoming permanent citizens of the Dominion.

These men by the act of their coming to Canada as harvest hands have shown that they prefer work, even hard unaccustomed toil, to living in idleness on the "dole" in Britain. Each and every one of them had to pass a rigorous physical examination before being allowed to sail. They are, therefore, the pick of the unemployed miners, and animated by a desire to "make good" they should succeed if given a fair chance, and a helping hand and encouragement.

That chance, assistance and encouragement should be forthcoming in large measure from the Canadian people as a whole and, in particular, from the individual farmers who employ them. It will be necessary to show these men how their work should be done and how to do it. This will require tact and patience. Too much must not be expected of them. And the man who makes an honest effort to learn, who shows a real determination to work and render service to his employer, is deserving of every encouragement.

Such encouragement cannot be better shown than by a kindly, sympathetic attitude, a personal interest in the man's welfare, and, in all cases where it is possible to do so, by the offer of a job for the winter. The knowledge that, if he shows a disposition to make good, he will be provided with work for the winter, and thus given his opportunity to become a permanent settler in Canada, will provide the greatest possible incentive to a man who is desirous of achieving that result. And it is settlers of this British type of which Canada stands in need.

If both parties to this unique experiment strive to make it a success there is no reason why it should not succeed, and if it does prove successful, its success being judged by the results of the movement as a whole rather than by individual cases, then it will, in all probability, prove the beginning of a new and worthwhile immigration from the congested groups of the unemployed in the British Isles to the open spaces of Canada, where, through their labor, such people will be an important factor in bringing large tracts of vacant lands under cultivation, and in providing the necessary man-power to develop many of the as yet untouched natural resources of the Dominion, thus making comfortable homes for themselves and adding immeasurably to the productive capacity, wealth and prosperity of Canada, and incidentally, of the Empire as a whole.

No Menace To Consumer

British Delegate Returns Home Favorably Impressed With Wheat Pool

"We do not agree with those who see in the pool the menace of a monopoly to the disadvantage of the consumer," writes Henry J. May, general secretary of the International Co-operative Alliance, who was one of the principal speakers at the recent international wheat pool conference.

Mr. May expresses his views in the *Co-operative News*, published in Manchester, England.

He states that the economy of production on large scale methods, the elimination of the middlemen's profits

and the improvement in selection of seed made it possible for wheat pool members to reap larger profits from their crops and at the same time to give better values to the consumers.

"If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering."

Huskies For Byrd Expedition

Will Collect 100 Dogs In Quebec To Be Used In Polar Venture

To procure 100 huskies for Commander Richard E. Byrd's forthcoming Antarctic Polar venture, the task that has been entrusted to a party that has left Quebec on board the S.S. North Shore in quest of the right type of canine for the hazardous undertaking. The party is to comb the north shore of the St. Lawrence. When secured, the hundred dogs will be loaded on the steamer and brought to Quebec to be shipped to the Pacific coast, where they will be picked up by Commander Byrd.

British Immigration

Conference Between Lord Lovat and Ottawa Authorities Brings Results

When the immigration conference between Lord Lovat, head of the Empire Settlement Board, and federal immigration leaders concluded at Ottawa, an official statement was issued, saying "It is confidently expected that the result of these negotiations will be a steady increase in the flow of suitable British migrants to Canada."

The conference discussed various matters arising out of British immigration to and settlement in the Dominion, with particular reference to the measures to be adopted both in Canada and in Great Britain to give effect to the recommendations of the select standing committee of the House of Commons on agriculture and colonization. All these recommendations and other proposals made by Lord Lovat have been fully and frankly discussed, with a thorough appreciation of the difficulties on both sides and in every case a satisfactory understanding had been arrived at, the statement said.

Heavy Apple Crop

Increase of Almost 900,000 Boxes of Apples From Okanagan District Is Indicated

An increase of almost 900,000 boxes in the shipment of apples from the Okanagan River district is indicated in a report issued today by T. P. White, superintendent of car service, Canadian National Railways, Winnipeg. The latest estimates indicate that the "McIntosh" crop will amount to 1,252,490 boxes as compared with 738,493 boxes last year, or an increase of 513,997 boxes or 69 per cent. The total apple crop, which comprises largely the "McIntosh" and the "Wealthy" brands, is expected to amount to 3,928,255 boxes this season, which is an increase of 800,845 boxes over last year.

BABY GIRL HAD DIARRHEA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gull Lake, Sask., writes:—"Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhea. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Have'n't you any...'"

why, I wouldn't be without it where there are children."

"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhea and was running around as well as ever."

Reindeer For Hudson's Bay Area

12,000 Reindeer From Alaska To Be Sent Overland

Shortly after the fawning season is over, 12,000 reindeer will be herded from Alaska to the shores of Hudson's Bay, according to N. A. Branson, of the Dominion Reindeer Company. This is due to the rapid increase of the herd of 1,249 animals started in Alaska thirty years ago. Progress will be slow, the herd travelling about ten miles per day. But first, the shortest route must be found and charted.

WAS VERY DELICATE

New Health Came Through Using Dr. Williams' Pink Pills

Mrs. Chaparr Miller, Londen, N.S., says that while in her lifetime she has reason to be thankful for what Dr. Williams' Pink Pills did for her. She says:—"I was a very delicate girl growing into womanhood, when I first found benefit from Dr. Williams' Pink Pills. I was a sufferer with cramps and with every six weeks was hardly able to move around at all. One day when I was very sick at bed with influenza, and was told to my mother, 'Why not try Dr. Williams' Pink Pills. I know they will do her a world of good.'"

The result was my first gas boxes and I began their use, and I soon found benefit from them. By the time I had taken them all I felt altogether different girl and no longer suffered from cramps and pains. Then a few years ago I was attacked with my mother's gas boxes for six weeks. Again I started taking Dr. Williams' Pink Pills, and again my health was good. I am the mother of a family and do all my own work, so you see I have to keep in good health, and depend upon these pills to keep me so. Now I always recommend Dr. Williams' Pink Pills to any of my friends who may be sickly."

If you are suffering from any condition due to poor, watery blood, or weak nerves, begin with Dr. Williams' Pink Pills now, and note how your strength and health will improve. You can get these pills through any dealer in medicine, or at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Reforms In China

Women Must Bob Hair and Remove Bindings From Feet

The municipal bureau of public safety, has decreed that Peking women under 30 years of age must bob their hair or pay a "degeneracy tax." The order became effective Sept. 1. It is meant to discourage the old Manchu style of hair dressing and contradict the ruling of General Chu Yu-Pu, military governor of Chihli, under the former regime, who repudiated hair bobbing, threatening to punish even his own consorts for disobeying this order.

The mayor, Ho Chi-Kung, is determined to eliminate feudalistic habits still adhered to by some of the Peking people. He has ordered that men who insist upon wearing queues must pay a heavy monthly tax and women must remove the bindings from their feet within the next few days or pay a periodical fine.

Choked For Air, Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing relieves such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke of vapor penetrates, clears the passages and gives untold relief. It has behind it years of success. It is the sure remedy for every sufferer.

Supplies For Northern Posts

Schooner Sails From Vancouver On Mission For R.C.M.P.

The new auxiliary schooner St. Roch, of the R.C.M.P., has set sail from Vancouver to carry fresh provisions and supplies to the posts in the R.C.M.P. It is manned by a crew of 13 officers and men headed by Captain W. H. Gillen, Vancouver, and P. Kelly, chief engineer. The course set for the northern trip is through Bering Straits and around the northern coast of Alaska to Herschel, Yukon territory. By radio the floating detachment will keep in touch with headquarters at all times. Members of the R.C.M.P. comprising the crew include: Constables R. G. Paroloe, M. J. Olsen, Larsen, Tudor, Foster, Sealey, Parry and Lamothe.

Many infants are infested by worms which cause great suffering, and if not promptly dealt with, may cause constitutional weakness difficult to remedy. Miller's Worm Powders will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

For the first time a film has been shown in an aeroplane. It took place in a machine travelling from Paris to London.

Planting Trees On Highway

One Of The Most Beautiful Driveways In Western Canada Planned By Mr. Pat Burns

The main south highway from the Calgary city limits south to Midnapore, some ten miles, will be transformed into one of the most beautiful drives in Western Canada within the next two years as a result of the decision made by Patrick Burns, well known pioneer cattleman and rancher, to plant trees on his land, which skirts both sides of the highway clear through to Midnapore.

Work of preparing the land for the tree planting is already under way, and the first trees will be planted next spring. The section between Calgary and Midnapore will be completed next summer, and it is possible that Mr. Burns will extend his activities further south the following year as he owns a considerable amount of land south of Midnapore. Russian poplars will be used with maples scattered here and there.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Year's Shipment of Wheat

In the 1927-28 crop year, ended July 31, last, a total of 261,000,000 bushels of wheat was handled through the elevators at the head of the Great Lakes, situated at Port Arthur and Port William, Ontario, on Lake Superior.

Athletes—Keep Minard's Liniment handy.

If we do not watch, we lose our opportunities; if we do not make haste, we are left behind; our best hours escape us.

Powerful!

90,000 Horsepower is the amazing total amount of current produced by Eveready batteries in a single year!

The strong current and uniform long life of these Dry Cells and Hot-Shots have made them the first choice for all types of farm ignition.

Always buy Eveready Hot-Shot for work in exposed places. The metal cases protect the power supply against exhaustion during damp nights or in wet weather.

Look for the name Eveready before purchasing. If it's not an Eveready it's not a Hot-Shot.

Proposal To Build Tunnel Under The English Channel Is Again Receiving Serious Consideration

Several times in the last half century has the proposal to build a tunnel under the English Channel been discussed, says the Toronto Mail and Empire. Now it is once more up for consideration. At one time it seemed that the project was about to get under way. Borings had been taken on both shores and soundings and other data collected along the floor of the channel under which the tunnel would have been constructed. It was announced that no engineering difficulties stood in the way. Financial support for the tunnel had also been guaranteed. All that remained was to secure the permission of the British Government, the French being willing that permission was refused, and later it was explained that military reasons decided the Government's course. It is presumed that this is the only obstacle to be removed if the project is now to get under way. At first the military fear was of an invasion. This objection was met by the engineers who planned the tunnel. They showed how the pressing of an electric button could flood the tube and drown any invading army that happened to be in it. When the project was next mooted it was explained that the military reasons for refusing permission were based on the possibility that Great Britain might be invaded and captured and that the tunnel would then be a valuable possession of the enemy as part of the spoils of war. This seemed far-fetched, for it seemed unlikely that if England were really under the iron heel of an invader she would worry much about what happened to the tunnel.

A few years ago Marshall Foch was reported to have said that if the tunnel had been in existence in 1914, the war might easily have been averted. Undoubtedly if it had not been averted it would have been greatly shortened, and in the course of the struggle the tunnel would have paid for itself many times over. In the event of another European war with England involved as an ally, France, the possession of the tunnel would prove of incalculable value in transporting troops and supplies, and in avoiding the hazards of ferrying them across, hazards which are bound to increase as the plane multiplies and becomes more effective as a military weapon. But it is not because of its service in a future war that the tunnel is now being advocated, but as a means of swifter communication between the British Isles and the continent of Europe, Italy, Belgium and Switzerland, as well as anxious as France to see the work approved and construction begun. They look into the future and see trains running every half hour between Paris and London, special through trains from Scotland and Southern France, and perhaps later a tube in which motor traffic can pass under the sea floor from one country to another in half an hour. The channel passage is notoriously a bad one, and its perils have kept thousands of people from enjoying a visit to the Continent and intimidated equal numbers of Europeans from visiting the British Isles. The only interests that would seem to be adversely affected by a channel tunnel are the shipping interests, and this would apply only to the passenger service.

Canada Owns 50 Per Cent. Of Timber
The people of Canada, through their Federal and Provincial Governments, still own outright about 50 per cent. of the total standing timber; this, however, consists of the less valuable stands.

The man who tackled a business for which he is not fitted is apt to find it more troublesome and vexatious than profitable.

"They say the god Janus has two faces."
"It must be a terrible job to wash them every day." Monique, Charleroi.

Women and the Senate

Will Make Application For Leave To Appeal From Recent Decision Of Supreme Court

Women of Alberta will make application to the Judicial Committee of the Privy Council for leave to appeal from the recent decision of the Supreme Court of Canada, to the effect that a woman is not a "person" within the meaning of the British North America Act and not eligible for appointment to the Senate of Canada.

Magistrate Emily Murphy, who is one of the Alberta appellants in the case, has announced that counsel had been authorized to make this application for leave to appeal.

Referring to recent despatches from Ottawa to the effect that provision would be made at the next session of Parliament for the amendment of the British North America Act so that women might sit in the Senate, Magistrate Murphy expressed her "heartiest appreciation of the government's desire to right this matter."

The government had informed the appellants they would not oppose the application to the Privy Council which was not meant to "interfere with the means devised by the Canadian Government but is taken in order to obtain definitely an interpretation of the word 'person' in Section 24 of the Act."

Winnipeg Newspaper Union

New Sports Type

It is effectively interpreted in marine silk crepe with front closing vestee with rolled collar, and pointed cuffs of blue and white silk pique with diagonal stripes. The skirt shows attractive front fullness in plaits at each side with inverted plait at centre. It's a sports dress that meets the demands for every type of woman, and is designed in sizes 16, 18, 20 years, 22, 24, 26, 28, 30, 32 and 34 inches bust, and only requires 3 1/2 yards of 40-inch material with 1/4 yard of 40-inch contrasting. Shown with black silk crepe, printed and plain silk crepe, shantung, washable silk crepe in pastel shade with white vestee, crepe satin with dull surface, and printed and plain linen are practical combinations for Style No. 222. Pattern price 25 cents in stamps or coin (coin preferred).

We suggest enclosing 10 cents additional for a copy of our Fashion Magazine.

Many Elevators Built In West

Grain Storage Capacity Has Been Greatly Increased During Year. One hundred and eighty new elevators were built at country points on the Canadian National Railways this year, according to T. P. White, Superintendent of Car Service for the Western Region of the Company. These provide an additional storage capacity of 3,566,000 bushels, divided among the Prairie Provinces as follows: Manitoba, 21 elevators with 744,000 bushels; Saskatchewan, 18 elevators with 546,000 bushels; Alberta, 69 elevators with 2,276,000 bushels.

The capacity of all elevators at the Canadian head of the lakes, namely, Port William and Port Arthur, Ont., during the crop season, 1927-28, was 72,540,000 bushels. With new elevators and additions to existing elevators, the capacity for this year's crop at those ports will be 86,099,000 bushels in elevator space. The lakehead is the largest grain receiving terminal in the world.

On the Pacific Coast, namely at Vancouver, Victoria, New Westminster and Prince Rupert, the capacity of the elevators last year was 9,795,000 bushels. This capacity will be increased this year by 14,175,000 bushels, an increase of 4,380,000 bushels.

The Dominion Government, under the jurisdiction of the Board of Grain Commissioners for Canada, operates interior storage elevators at Calgary, Edmonton, Moose Jaw and Saskatoon, with a combined capacity of 12,000,000 bushels. There are also private elevators doing a storage and mixing business in the Calgary, Edmonton, Moose Jaw, Saskatoon and Winnipeg Districts, with a capacity of 11,092,000 bushels. The total storage capacity may be summed up in this way:

	Bushels
Head of Lakes	86,000,000
Pacific Coast	14,175,000
Government Elevators	12,000,000
County Elevators	80,000,000
Private Elevators	11,192,000
Grand Total	203,367,000

Ontario Wheat Pool

Close Of First Year Of Operation Finds Feeling Of Elation

With the recent mailing of cheques to the 7,000 growers who supplied 1,750,000 bushels of wheat, the Ontario wheat pool closed its first year of operations. The management expresses gratification at the prices secured. "We feel," said H. H. Clones, general manager, "that Ontario wheat for the first time, both pool and non-pool, has been sold within a reasonable parity with Western wheat," yielding members a gross return of \$13.22 1/2 for the higher grades of red winter, and \$13.00 on white and mixed wheats.

Jennie: "Dick didn't blow his brains out when you rejected him. He came round and proposed to me." Jeannette: "Then he must have got rid of them some other way."

SETTLER MAKES GOOD

In March, 1928, L. S. Gaspar arrived in Canada from England and was placed by the colonization department of the Canadian National Railways in farm employment at Watson, Saskatchewan. He was so successful that in July he was able to bring out his fiancée, Miss Lillian May Little, of Bristol, and they were married in Winnipeg on July 31st. Mrs. Gaspar will assist her husband in his farm work at Watson and next year they intend to take up land of their own.

SACRED BIRD OF JAPAN

The Yokohama sacred Japanese bird (above), has been presented to the Canadian National Exhibition for exhibition in the poultry department. Frank M. Johnston, director of the poultry department, is seen holding this bird which has a tail fifteen feet in length.

New Municipal Hospitals

Twenty Hospitals In Rural Alberta Now In Operation

With the building of the new \$200,000 forty-bed municipal hospital at Grande Prairie, the building of the municipal hospital at Stettler for which tenders have been called, and the completion of smaller 14-bed hospitals at Vulcan, in the south, and Elk Point, in the northeast, the number of municipal hospitals in Alberta will be brought up to twenty, according to Hon. George Hoadley, minister of health.

Mr. Hoadley has just received the Grande Prairie hospital vote, and is gratified to find that the district gave a majority of 107 over the Two-thirds vote required, the actual count being 1,463 for the hospital, and 678 against. Two scrutineers from Stettler, who some opposition to the new hospital was registered, conducted the count.

Vancouver's wheat shipments have risen from half a million bushels to over 70 million bushels in seven years.

Says Latent Wealth Of Canada's Vast Northland Is Only Awaiting Development

The Price Of Bread

Shows No Indication Of Any Immediate Decrease

The price of bread in Canada shows no indication of any immediate decrease and depends not on the low wheat prices of the pool at present, but on the prices when the crop has been harvested, said a prominent Canadian milling authority in an interview at Montreal.

The price of bread in England has been steadily on the decrease since last April and it is expected that further drop is imminent. The price there now is 16 cents a loaf, a lower cost to the consumer than has been reached for the last five years. The reason for this, it was explained, is partly due to the crops this year in the Argentine and depends in a lesser degree on those of Australia.

Moreover, English importers of wheat and flour buy "from hand to mouth" and do not lay up a long supply for future use. They are enabled to do this due to the availability of recently harvested crops at all times of the year.

It is natural that when the crop is harvested and the markets flooded that the prices will decrease. This is the difficulty. The Canadian buyer has purchased at a higher price. The level to which the price falls following the harvest is below the price he must ask in order to profit. Therefore, with the present market very low, bread here must remain at its present price level because the wheat purchasers still have quantities of this commodity on hand that they bought at higher prices.

Foolish Rumors Denied

Wheat Pool Officials Say That Carry-Over This Year No Larger Than Last

Statements emanating from various sources to the effect that the wheat pool had an enormous carry-over from the 1927 crop and was in a "blue funk" because of the large volume of new crop to be delivered within the next few months, were characterized as "ridiculously inaccurate" at the headquarters of the Alberta wheat pool.

Officials stated that the estimates of the wheat pool carry-over have been placed by certain newspapers as being anything up to seventy million bushels. As a matter of fact the wheat pool carry-over this year, they said, would not be any larger than that of last year, which was in the neighborhood of ten million bushels. There was a possibility that it would be less than the latter figure.

It is true that the Canadian wheat crop will be large this year, headquarters of the pool at Calgary stated, "but such far-fetched estimates as that of 700,000,000 bushels, which was recently given by Winnipeg to Chicago are entirely uncalled for and do a great deal of damage. As a matter of fact, the crop may not exceed that of last year, and outrageous estimates only tend to lower prices," officials said.

Headquarters stated that the pool handled last year's crop, in spite of the damaged condition of a large portion of it, in a capable and efficient manner. There were no grounds for the belief that it would not handle the forthcoming crop in an even more efficient way.

Penalty For Drunken Drivers

No Quarter To Be Given In Ontario, Attorney-General Has Ruled

Drunken drivers will be given no quarter in criminal prosecution, Hon. W. H. Price, attorney-general for Ontario, has ruled. The practice, once common, of laying charges of reckless driving in cases of drunkenness was severely condemned by the attorney-general recently. A conviction for being drunk in charge of a car will mean jail without the option of a fine, but for reckless driving a fine alone may be imposed, he said.

The minimum penalty for a first offence of drunken driving is seven days, and the maximum thirty. For a second offence the sentence is not less than three, and for subsequent offences not less than three months nor more than a year.

The lack of nourishment in the Equatorial and Arctic zones keeps those people short. People who live in the fertile temperate zones have more and better food and therefore grow taller.

Occasionally, says the Atchison Globe, there is more brains in the back seat than at the wheel.

The Canadian Club was addressed on Friday by the autocrat of a land more than half as large as the United States, rich beyond all telling in both precious and base metals, in coal, in oil and in timber, its land areas prolific in animals clad in valuable furs, its waters teeming with fish and the mammals that prey on them. For when the Hon. Charles Stewart goes up into the higher latitudes of latitude he becomes lord of all he surveys. Holding the dual portfolios of the Department of the Interior and the Department of Mines, and also being Superintendent of General Affairs, he is the real governor of the northern and larger part of the Dominion of Canada. Over all this vast region, by far the greater extent of which is virtually unexplored, into which only here and there has the surveyor driven his stakes, and where the voyager may travel hundreds of miles along mighty streams without seeing the smoke of any camp fire but his own Mr. Stewart, as he told the Canadian Club, has complete control.

It is little wonder that such an Empire fires the imagination of its ruler. With rapid phrases Mr. Stewart sketched the wealth of natural resources awaiting development in Canada's great northland, far beyond the frontier of the more or less settled belt, three hundred miles wide, that parallels the boundary line. He took time to glance at this latter and to observe that, even there, the possibilities of development of a vast part of its natural resources were but little realized, and most inadequately estimated. But it was evident that his heart was in the north, that his eyes were set on the treasure hidden in the great pre-Cambrian shield, stretching from the region south of James Bay to Portland Canal. He talked of pulp and paper manufacture, and of water powers and electric development, as well as his implication throughout was that these, like mining, despite the enormous advances made during the last few years, were still in their early stages in Canada.

His message was plainly directed to the young men of Canada. It was not "Go West" but "Go North." Above all it might be read as an indirect exhortation not to go south, not to leave the best young man's country in the world on the eve of an era of great material progress. It is sometimes said that the big opportunities have gone, that there are no more openings through which a young man without influence or money may win his way to great achievement. It is not true. Twenty years hence the youth of that day will look back on this period and wish they had been born early enough to take advantage of the chances that some of their fathers' contemporaries were bold enough to seize. To the boys of this generation Canada's north should be what California was to the boys of eighty years ago, and what the Yukon was within recent memory—the land of adventure where wealth awaits him who can win it—Vancouver Star.

To Investigate Forage Conditions

A botanical survey of parts of Wood Buffalo Park, near Fort Smith, Northwest Territories, will be made this summer by officers of the National Museum, Ottawa. The forage plants and range conditions in certain areas of the park will be investigated with the co-operation of the North West Territories and Yukon Branch of the Department of the Interior, which administers this area.

Canada's net debt was decreased by \$87,000,000 as on March 1, 1928. Eighty-two per cent. is held in Canada.

The Wastebasket

A dealer sold a hayrake to a farmer and it wasn't working to suit the owner. The farmer came into the store and told the dealer he thought the wheels of the rake were too high, as the times didn't get to the ground properly. "It's your land," replied the dealer, "it's too low."

"We've had a simply delightful time," said one of the guests as a number of ladies were leaving a social gathering one afternoon last week. "I'm so glad," replied the hostess "but at the same time I regret that the storm kept all of our good people away."

"That Innisfree girl admires you Bob," said one local fellow to another at the dance there last week, "why don't you propose to her?" "I admire paintings," Bob replied, "but I'll be hanged if I want to marry one."

"So you had to give up teaching your wife to drive?" a young married man here was asked by a friend. "Yes, we had an accident," he replied, "when I told her to release the clutch she let go of the steering wheel."

Judging from the numerous articles and the fuss being made about it we gather that the secret of health is still a secret.

"Has he got pajamas?" asked a nurse at a hospital in a neighboring town of a woman whose husband was taken ill and brought there. "Pajamas?" the woman exclaimed, "I dunno what it is, but he's got an awful pain in his stummick."

Courtship is the period in which the girl decides whether or not she can do any better.

Heard at the ladies social: "My operation wasn't very serious in any way it was a very small operation." "Just an opeetta, I suppose?"

Heard at the postoffice: Clerk: "Is there any writing in this package?" Patron: "Well, not exactly, it's a can of alphabet soup."

The path of true love never runs smooth, says a local observer, but a detour is even rougher.

"I believe I have this dance," said a Viking fellow to an Innisfree girl at the dance here last week. "Well, don't let me interfere, then," she replied.

"That rouge certainly looks natural," said a local fellow to a Jarow girl. "I thought for a long time it was your skin." "Well it's the next thing to it," she replied.

"That second-hand car you sold me won't go," said a patron of a local garage. "Well, you told me that you wanted one that wouldn't use much gasoline," the proprietor replied.

"What do you fellows talk about after the dance?" asked a local girl of her fellow the other evening. "The same things you girls talk about," he replied. "How horrid of you," she exclaimed.

"Haven't I shaved you before, sir?" asked a barber at Toffield of a customer. "No," he replied, "I got those scars in France."

"I was going to have a sponge cake to surprise you, dear," said a recent bride here to her husband, "but it was a failure." "What was the matter?" he asked. "I think the store sent me the wrong kind of sponges," she replied.

GIRLS, LISTEN TO THIS

A local fellow has handed in the following poem, and asks us to publish it in the hope that he will get a response. Girls wishing to get in touch with the author of this poem should address No. 13231313 care of this paper.

I never ran around and drank
A lot of beer.
I never robbed a baby's bank,
So it seems queer
That I should be destined to live
My life alone;
When some nice girl could surely give
Me moral tone.
I wish I knew some girl on whom
I could depend,
One who knew how to use a broom
And who could mend
My shirts and socks and underwear
When they are torn;
It's really more than I can bear
I'm so forlorn.
There must be some girl on the earth
To heed my plea,
Someone to bring a little mirth
And joy to me.
Give me a blonde or you can make
It a brunette,
I'm not particular, I'll take
What I can get.

WHIPPET CARS

VIKING

The members of the ladies curling
club met at the home of Mrs. Basil
Hilker last Thursday evening in hon-
or of one of their members, Miss S.
Gilbert, who has gone to Edmonton to
be the principal of the schools. A real
social time was had after which Mrs.
Robinson, president of the club in a
neat little speech in which she voiced
the sentiments of the club they were
sorry to lose her, and spoke in appre-
ciation of the splendid work she had
done along many lines in the commu-
nity. Miss Gilbert was presented with
a pearl manicure roll as a token of
esteem and remembrance. Dainty re-
freshments were served.

With the advent of thousands of
harvesters and strangers into the
province the provincial police wish to
issue warnings to merchants & others
to be on the look out for suspicious
characters that may come in under the
guise of harvesters.

The drillers at the Hudson Bay Mar-
land Oil well are down around 2200
feet and have been busy the past week
cementing in the pipe so that they can
drill right through the gas sands
without encountering any trouble from
the flow of gas.

Mr. Andrew McGregor, wife and
family passed through Viking Sunday
enroute to Mundare and Vegreville.
While at Viking they stopped off and
lunched with the Cottrell family who
are their old friends. Mr. McGregor is
contractor for the Calgary Power Co.
and has just come from Wainwright
and Sedgewick where he has been in-
stalling the power system.

Monday, September 10th at 8 P.M.
a meeting will be held to form a
Young Peoples Social Club, also to
form a Dramatic Society. It is also
hoped that the older members of the
Church will attend to form a Commu-
nity. Chair will be taken by the Rec-
tor, who was for some years president
of the (Norwich, England) Theopian
Dramatic Society with the late Sir
Henry Irving, Sir John Hare and
Forbes Robertson, Vice-Presidents.

Young People of other churches are
also invited to join.

Shareholders of the Viking Elks
Community Hall Co. should not for-
get the meeting in the Elks Hall on
Friday evening, September 14th at 8
o'clock for organization purposes.
Notices have been sent out but if any
shareholder failed to receive one be
sure to come anyway.

Dr. and Mrs. Honsberger, of Kitch-
ener, Ont., were week end guests at
the home of Mr. and Mrs. H. M. Hil-
liker. They motored to the Buffalo
Park and saw the sights there and left
on Monday evening for Jasper Park
where they will see more of the won-
derful sights of Alberta.

Several afternoon teas were held in
honor of Miss S. Gilbert who left on
Monday for Edmonton where she will
be principal of the schools. Mrs. H.
B. Collier entertained a number of
ladies in her honor on Tuesday after-
noon. Mrs. W. H. Anderson on Friday,
and Mrs. H. P. Stock on Saturday.
Quite a large number of former pupils
and friends were at the station on
Monday to bid her farewell.

Mr. and Mrs. W. M. Davidson and
Miss Ida Whitehead motored up from
Dayland and spent Sunday with their
aunt Mrs. J. Sutter.

Mr. S. Sutter, of Bruce, Ont., and
Mrs. Wm. McMaster, of Waterton,
Ont., are visiting with their brother
J. Sutter, north of town.

Mrs. Harry Airth and children re-
turned home to Edmonton on Satur-
day after two weeks visit with rela-
tives and friends north of town.

A Mr. Russ of Jarow died at the
hospital here on Saturday and his
body was taken to his home there for
burial.

Miss Gladys Harris returned on
Monday from a vacation spent with
relatives and friends at Edmonton and
Calgary.

Mr. Castor, of Oyen, Alberta, is the
new manager of the local wheat pool
elevator.

JARROW

Mrs. Austin and daughter have been
visiting at the home of Mr. J. T.
James south of town, for the holidays.
Miss Myrtle Peet is assisting Mrs.
Firkus for a few weeks.

School opened Sept. 4th with Miss
M. Smith in charge of the grades from
VII. up and Miss Miss Kennedy in
charge of the lower grades.

Mrs. Bell is visiting her daughter,
Mrs. N. Lutton this week.

At a public meeting in the school
a Community League was formed with
Mr. P. H. Bamsey as president and W.
H. Barton, Sec.-Treas. The big thing
they are undertaking at present is a
hall for Jarrow.

R. T. Meakins is putting a coat of
paint on the Post Office these days.
Most of Jarrow went to Kinsella
last night, September 4th to Rev. A.
O. McNelly's Indian Service, which
was held in the United church at that
place.

Mr. and Mrs. W. Com'ey have had
as their guest, Mr. Comley's brother,
Rev. Comley and his wife.

Geo. M. Manners

Irma, Alberta

IS YOUR CHILD HANDICAPPED?

Does your child's nose run or
is it sore? Does the child snuffle? Are
the eyes red? Does the child seem
dull? Does it stand and look at you
with open mouth? Does it put its hands
to its head as though it had ear-
ache? Does the child sleep with its
mouth open? Does it snore? If the
answer to any of these is yes, ask the
doctor if the child has adenoids or
large tonsils.

Tonsils often become diseased and
stick out into the throat. Sometimes
diseased tonsils do not get any larger,
but contain little pits filled with puss.
Diseased tonsils hold poisonous germs
which may cause throat trouble or
may be carried to other parts of the
body and cause serious sickness.
Adenoids look like a little head of
cabbage colored red. They grow in
the back part of the throat where the
nose and throat joins and can be seen
only by the doctor with a special
mirror. They stop up the nose and
make the child breathe through its
mouth, when the child breathes through
the mouth much dust and many
germs get into the body. Adenoids
should always be removed. Earache
often means a child has adenoids. Ear-
ache always means the child is in dan-
ger of getting deaf, also there the dan-
ger of running ears. A doctor should
treat a running ear always when ad-
enoids grow or tonsils become diseased
the glands of the neck try to carry off
the poison. This overwork makes glands
enlarge and lumps are visible on
the neck.

Diseased tonsils and adenoids are
reservoirs for poisonous germs that
are frequently carried to other parts
of the body and cause sickness.
Rheumatism and heart disease often
come in this way. Stomach, Bowel or

Do Not Neglect Your Eyes!

Lung disease may also arise from the
same source. A child with adenoids
and diseased tonsils can get the com-
municable diseases such as Scarlet
fever, diphtheria, etc. very easily.

Often children who seem stupid and
who do not learn rapidly, can be made
healthy and normal by the removal of
diseased tonsils and adenoids. Don't
wait thinking they will get better. It
is dangerous.

CANADA'S MUNICIPAL YEAR BOOK

The third annual edition of the
Canadian Municipal Directory has
just come to hand and again shows a
considerable improvement over ear-
lier editions.

The contents of the book having
alphabetical arrangement makes the
information contained therein easily
accessible. In the introduction, the
point is made that there are 4,300
self-governing communities in Can-
ada with 50,000 officials engaged in
conducting the affairs of these many
cities, towns, and villages. It comes
as a surprise that there are so many
individual urban and rural commu-
nities and there is undoubtedly great
credit due the editor, Mr. H. Wisely
Bragg, for the excellent manner in
which this vast amount of material
has been collected together, and so
carefully classified.

The contents of the book are so
arranged as to give Municipal men
the most comparative information and
cannot fail to be of the greatest pos-
sible assistance to elected and appoint-
ed officials, enabling them to compare
our community with others of a
similar size and population. It is
further a book of considerable im-
portance in every Municipal office
for no other work of this kind is

published in the Dominion, and no
man interested in Municipal progress
can afford to be without it.

The book is divided into three chap-
ters, the first being an alphabetical
directory by provinces, of Municipal
men from coast to coast, the larger
places having a full Municipal per-
sonnel included, and the rural com-
munities, the chief officials.

Part two deals with particular of a
reference and comparative nature, and
provides the best and most complete
information on the financial standing
of communities, and also gives ta-
bulated information on the very im-
portant question of waterworks. There
are also a number of leading articles
that supply a fund of useful knowl-
edge on several different subjects, all
applicable to municipal endeavor.

The third part of the book is de-
voted to a Buyer's Guide, for the use of
Municipal officials, and everything that
they have occasion to require, is
listed together with the names of the
manufacturers and dealers. In connec-
tion with this last part of the work
there is also a free Buyer's Service,
which will prove of considerable
assistance to Municipal men.

It is interesting to note that this
Municipal Year Book, is to be fol-
lowed up by the publication, in about
four months time, of a new work
Canada, which will be an interesting
biographical book of reference, pro-
fusely illustrated, and constantly made
use of in every newspaper office.

In the capable hands of this well
known publishing firm, and edited by
Mr. H. Wisely Bragg, familiar to all
Municipal men for twenty years, it
will indeed fill a long felt need.

The publishers are The Wisely
Bragg Publishing Company Limited,
at 615 LaSalle Street, West, Mon-
real, and the Price \$2.50.

CHAPTER XXXI.—Continued.

Eva was lying on the couch while Eva sat beside him, the light so shaded that he could not see her face. She sat motionless through it all. He told of his return from the north and finding her gone; of his suspicions, confirmed, as he thought, by seeing her in Edmonton; of his sudden resolve to enlist; and lastly of his meeting with Arthur Warner. "I don't know," he concluded, "what is the explanation of the Winnipeg affair, but I know Helmi is innocent. She was sent to that place by someone and is shielding that person. Look at her letters, Eva—read them—and to think I doubted her and left her alone when she needed me!"

Eva took the letters in her cold hands, but she could not read a word. "I got the news of my baby from another man," said Jack broodingly, "and it was my niece Helmi got instead of mine to help her. Helmi had to beg for work and suffer insult. See what she says there: 'No one wanted a girl with a baby.' Wasn't it damnable, Eva? I rage when I think of it. I blame myself—I shouldn't have believed anything. I knew how sweet and good and true she was—I knew! But the person that sent her for the dope and then said out in the person who should be shot, and I'll sit it to the bottom when I go back." Poor Helmi, bearing it all because she was too honorable to tell!

In his excitement and deep emotion Jack did not notice that his sister had not spoken, but sat with bowed head, like a broken fly.

It was one of the soft nights when the blossoms are just beginning to scent the breeze, when there are those indescribable stirrings and whisperings of spring. Even if nations are at war and planning the destruction of each other, trees leaf and blossoms open. The streets seemed quiet to Jack; but for the heavy rumbling of the busses no one appeared to be abroad.

Suddenly the silence was broken by a weird, spitting noise as of giant fire-crackers; a sound of deadly im-

port to the people of England, for it gave warning of the approach of enemy air craft.

"It's an air raid," Eva answered, without stirring. "They run to the tube stations; but I never go—I feel safer here—I have a dread of being smothered in those terrible places. I've been through three air raids already. So I am not afraid."

Eva spoke with a composure which was not assumed; anything was better than the maddening remorse that had swept over her as Jack told his story.

Jack went to the window and looked down into the street. Through the open window came the drone of the enemy's Zeppelins, malevolent, horrible, like the buzzing of some poisonous fly. Then came the continuous canoodling of the anti-aircraft guns, like wildcat days of battle. The searchlights combed the sky with their ghostly fingers, and people came tearing out of their houses and raced through the dark streets.

Jack had often wondered how people would act during an air raid. He felt no fear for himself—it didn't occur to him that he could be a danger here in London—his fear was for Eva. "Hah! I've better go, Eva," he asked anxiously; "it seems to be almost about us. Is the tube far away?"

"Not far—but I never go. Come away from the window. There—that's a bomb—not far away—we're in for it. Jack, they're coming nearer. Come here, Jack, I feel dizzy—come to me—I want to tell you something. I knew your Helmi in Winnipeg. She is not to blame—sent her, Jack. Forgive me—I sent her to the Chinaman's! Ask her to forgive me, too. I have been sorry ever since."

A bomb burst in the square, there was a shattering of glass and a crashing of masonry; a horrible confusion of noises, tearings, screaming, concussions, clanging fire-engines.

By a strange chance the house in which Eva had her suite stood though many houses in that vicinity fell. All the windows were shattered and on the window sill of the room in which they stood was thrown the body of a little dead dog.

On the floor, where she had fallen, Eva lay, a piece of shrapnel in her cheek.

Jack stayed in London until Eva was out of danger. She would recov-

er, the white-uniformed doctor at Guy's told him, but of course she would be badly scarred.

Behind her bandages, Eva smiled, feebly. "It's all right Jack," she said wistfully, holding his hand; "better women than I have been blown to pieces. Maybe God is giving me a few more years to atone for what I have done. I have been a poor sport. Jack—I needed a smash of some kind—I am not complaining. Life is queer, Jack, isn't it? I wanted to show Humphrey I wasn't as selfish and shallow as he thought. He told me in the last quarrel we had, and the only one, that I would never be an old woman—I would only be a stale novelty. I was determined to show him I had some thought of doing things for other people, so I came here and got into the V.A.D. work. What I really wanted to do was to drive an ambulance in France, but I was afraid, not of death, but of disfigurement. I hate ugliness so far more than sin."

"It was my hatred of ugliness, not of sin," Eva continued, "which cured me of the drug habit. I had learned to take dope just because it gave me a thrill—it saved me from dullness, but I saw an addict—one of the doctor's patients—a woman, something like me, but horrible to look at, pasty-faced, dead-eyed, mouth agape—and I could see I might some day be like that. So, Jack, I never touched it again."

Eva paused for a long time. "But now, with a blue scar on my cheek and my nose broken, I will not be afraid. I will go to France, maybe. I can take the place of some better and happier woman, and when the shell comes marked for her, it will take me instead. And Jack," she continued, "you will tell Helmi all of this and ask her to think kindly of me as she can. She loved me once with all a young girl's adoration."

Jack kissed his sister tenderly with a deep sorrow in his heart. He could not reproach her—there was no need, but his own heart was aching with the sorrow of it all. Sin and sorrow—the age-old partnership—sin and sorrow. By one man sin came into the world and death by sin; but the one who sins is not always the one who suffers.

Jack had cabled Keith, his former partner, from Paris to send to London one thousand dollars. But when he reached London he found that a reply had come. "Keith of Winnipeg," could not be found. He had left the city over a year ago, and his creditors had not been able to trace him.

Jack sat on one of the wooden benches in the cable office in London and thought, in a quietly defined way, of what this meant to him. He wondered at his own callings in the face of such a smashing blow for the gold mine on the Yukon, with all the comfort and luxury it would bring him, had been much in his thoughts during the cheerless months of imprisonment. He had planned many generous surprises for his companions. . . . And now it was all over. He had been following a false light. He had had his warning in his hands at a painted fire.

Well, there was about two hundred dollars coming to him from the War Office, and he would be given transportation home. Prisoners who had escaped through a neutral country were not allowed to go back into the army.

When the Olympic sailed out of the harbor at Liverpool into the muddy waters of the Mersey, Jack stood on the deck looking back at the receding shores of England. Behind him lay bitter thoughts and much disillusionment; the futility of war; the hideous wastage of young life; the horrible suffering and slaughter; and Eva, his only relative. He choked with bitter memories as he thought of it all. Then there came to him, beating up through all this, like a fountain of sweet water in the sea, the memory of Arthur Warner and his unselfish love, and of Helmi, with her clear, sweet soul and her honorable walk.

Jack walked to the prow of the vessel and looked away into the gray distance. Behind him lay the sorrow for the past, with its mistakes and regrets. Before him lay Canada—his own country—Helmi, and little Lili. (To Be Continued.)

The term "furlong" is a shortened form of "furrow-long." The average length of a furrow cut by a plow across a field was about 250 yards. From a rough indication of distance it gradually became fixed at 220 yards.

Blasted out of solid rock, a new "strong room" covering an area of two and a half acres has been constructed 150 feet below the Bank of France. The task occupied 1,350 men for three years, working night and day.

A Friendly Gesture

Germany's Friendship For England Revealed In New Book

Germany's rediscovered friendship for England is reflected in a small volume, just published, "London: Love of a City," by Walf Zuckerk, a young German publicist. The new book compares favorably with many a bulky tome, in which German travelers endeavor to enlighten their countrymen on matters beyond the horizon.

This latest contribution to German post-war literature on England shows the extent to which the "hymn-of-hate" psychology has been surmounted. For Zuckerk's volume is not merely a chronicle of objective impressions of London and England; it is the dithyrambic prose of an impassioned lover of London and England.

Unlike many of his European contemporaries, Zuckerk records his impressions of England and London, without any attempt to analyze them by Continental standards. Few foreigners have ever presented a more enthusiastic account of the English capital.

Tributes To Canada

Party Of British Chemists Are Favorably Impressed With Conditions Here

Tributes to Canada marked a dinner at Montreal tendered to the party of British chemists en route to the United States where the annual convention of the British Institute of Chemical Engineers will be held this year. Nearly 200 were present.

Sir Alexander Gibb, president of the British Institution of Chemical Engineers, declared that "our visits since arrival on Saturday at Quebec have impressed upon us more greatly than we knew the extraordinary way in which Canada is going forward. It makes one realize that Canada is cutting out a course for herself, an independent course, and a course that brooks well for the future not only of Canada but of the British Empire."

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word genuine printed in red? It isn't the genuine Aspirin without it! A drug-store always has Bayer, with the proven directions tucked in every box:

Aspirin is the trade mark registered in Canada. It is well known that Aspirin means Bayer's manufacture. To assure the public against imitations, Bayer's Aspirin is always stamped with their "Bayer Cross" trade mark.

Remarkable Migration Of Game

Interesting Sight Is Witnessed By Geographic Society Expedition In Africa

A remarkable migration of game in the Tanganyika territory is reported by Carvela Wells, of the Geographic Society expedition, the reports being made from the party's first headquarters in the Tanganyika territory, East Africa, where they arrived on July 23.

Sergeant Johnson, noted animal photographer, who is in the same district with Wells, estimated that there are about 10,000,000 head of game migrating across the country in a solid mass ten miles wide and 30 miles long at one spot.

Zebras were stated to be leading the way in a mass ten miles wide and five miles deep, followed by miles of gnus and other animals.

The explorer's camp at the time reported, was situated in longitude 35 east and about two degrees south of the Equator. Wells reported that notwithstanding this equatorial location the air was so cold he had to sleep in a sleeping bag and wear a thick overcoat and sweater, while he would have been very glad of a hot-water bottle at night.

The party had several exciting experiences with animals en route, particularly with one group of elephants which investigated the car in which Wells was riding, coming to within fifteen yards of it and finally slinking away.

GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic, diarrhoea and dysentery, come on so quickly that often a little one beyond age before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them. No other medicine is of such aid to the mother as Dr. Williams' Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Teeth and Health

Edited By The Canadian Dental Hygiene Council and Published By The St. Lawrence Dental Society

THE CANINES

You have referred to your dog Rover as a canine—that is what he is. This tooth, then, that is the first in line behind the incisors, is called the canine, from being extra well developed as in the dog and other carnivorous animals.

It is the most primitive type of tooth, and is known also as the cuspid, and as the "eye tooth," this last being only a popular designation.

Being observant, you have likely noticed that of the temporary teeth, this one was the last to be lost—serving thus, to keep the upper and ridges in right relationship for their permanent successors during the process of shedding the temporary teeth. But it may be that it remained in place unduly long, for not infrequently in the upper jaw, the permanent cuspid, though developing, does not erupt, in which case the temporary cuspid should be retained as long as it remains firm and sound, depending solely on the advice and responsibility of your dentist.

Now notice this point: Overlying the root of the upper canine, is an elevation, the "canine eminence," which serves to keep the tissue at the angle of the mouth well filed out. Then should you lose this tooth, this eminence disappears, with the resultant falling in of this tissue giving you prematurely the appearance of age.

So, you would keep your youthful appearance, beware. See to it that your "eye-tooth" stays sound, and free from the clutches of your dentist's forceps.

Little Helps For This Week

"Give, and it shall be given unto you; good measure, pressed down, and shaken together, and running over, shall men give unto your bosom."—Luke vi. 38.

Dig channels for the stress of love. Where they may broadly run; And love has overflowing streams To fill them every one.

For we must share, if we would keep That good thing from above; Ceasing to give we cease to have, Such is the law of love.

Richard Chenevix Trench
It is only the most pitiable of heart poverty that feels as if it could do nothing to add to the happiness of other lives, and does not even make the attempt. And where no love is given, the life shrivels and narrows until none can be received. The soul itself is refreshed and enlarged by the stream of love that flows through it; this is the true well of water springing up within unto everlasting life. Lucy Larcom.

No high-grade tea can be expected to retain its full flavor and strength unless packed in moisture-proof, metal-lined containers. Successful tea planters ship their tea in aluminum—the same rust, dust and damp-proof material which keeps Red Rose Tea always so fresh, strong and flavorful. B-W

Sleep and Repose

Doctor Says Sleep Becomes a Vicious Habit When Carried To Excess

Sleep becomes a vicious habit when carried to excess, said Dr. H. M. Johnson, "sleep expert" at the University of Pittsburgh. Most people, Johnson believes, get sufficient rest in the course of six and a half to nine hours to carry them through the day and make their work enjoyable. Sleep is vicious, he said, when it interferes with more interesting activities. Dr. Johnson studied 90 persons of both sexes ranging in age from 16 to 63 years in an attempt to discover the secrets of sleep. Women are less restless than men as a rule, he finds, and spend more time in bed. Persons engaged in mental activity during the day, sleep less than persons engaged in work that only feebly stimulates.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be truly estimated.

Both parties should remember that they are married for worse as well as better.

Minard's Liniment for Every Pain.

When a man offers you something for nothing, don't accept it unless you can afford to pay at least double its value.

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner does than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea, effective, too, for older children. Twenty-five million bottles were bought last year.

W. N. U. 1748

A New Map of the Manitoba and Patricia (Ontario) Mining Areas

is now ready for distribution

OWING to the tremendous activity and wide spread interest manifest in the Manitoba and Patricia, Ontario, mining districts, we have prepared a comprehensive map covering these areas. It also shows the new Favorable Lake gold area.

The location of the prominent properties now under development are indicated.

This map, 32 by 22, is divided into five sections and a key map, showing the comparative locations of these areas with proximity to railroads and power lines.

A request on the coupon below will assure a copy, reaching you, without obligation.

CANADA'S EXPANSION
Vancouver's wheat shipments have risen from half a million bushels to over 70 million bushels in 7 years.
Canada's production of newspaper paper increased from 794,567 tons in 1919 to 2,082,000 tons in 1927.
Canada's primary forest production totalled in 1926, \$204,426,328.
Canada's trade with the United States totalled, in 1927-28, \$1,216,102, 941 (an increase of \$49,745,190 over 1926-27). Exports were \$496,646,987; imports, \$719,455,954.
Canada's trade with the United Kingdom totalled, in 1927-28, \$508,094,

695 (a decrease of \$13,293,454 over 1926-27). Exports were \$412,776,114; imports, \$185,588,581.
It is predicted that Canada's gold production by the end of 1928 will be between \$44,000,000 and \$47,000,000, which would give the Dominion a place in production ahead of the United States and second among all the countries of the world.
Canada is second only to the United States in auto production.
Canada's forest products trade with the U. S. of \$211,345,861 provides a larger balance than any class of products.

Main Street

Mrs. C. Long is visiting her daughter at Red Deer, Alta.
Born to Mr. and Mrs. E. W. Carter, Friday, August 31st, a son.
Mrs. A. G. Walker left Wednesday for a trip to Calgary.

Miss Jean McLean left Monday to attend Normal.

Miss Oril Fischer has gone to Viking where she has accepted a position as teacher.

Mr. C. Loews of Acme, Alta., and his nephew, A. K. spent the week end at Mr. and Mrs. J. H. Archibald's.

The Church School Rally Day is September 30th at 11 A.M. Watch for announcements in the Church News and Posters.

The Alberta Telephone Department have a gang of men re-setting the poles along the main line from Wainwright to Viking.

Mr. Lorn Lennon of Lussland, Sask., and Miss Sadie Lennon of Provost, Alta., accompanied by their friends motored to Irma and spent the holiday at their home.

Mr. and Mrs. A. Perry and daughter of Edmonton, motored to Irma Monday. Mrs. Perry is a sister of Mrs. J. W. Jack, and a niece of Mrs. Simmons, with whom they are visiting.

Mr. H. Long, of Peterboro, Ont., has returned to Irma to make his annual visit and look after his Alberta interests. Mrs. C. Long who spent the winter in Ontario returned at the same time.

There have been several weddings in the Irma district during the past few weeks but as none of the contributing parties have given us any of the details we are unable to give a full report of them.

Mr. Eric Richardson, who has been spending his vacation at Ponoka, arrived in Irma Tuesday to spend a couple of weeks with his mother Mrs. F. W. Higginson, before returning to the University to resume his studies for his M. D.

Bobbie Guitner, the little boy who met with the accident with a gasoline torch about two weeks ago has been removed to the Mannville hospital, where his parents expect he will have to stay for some time.

Sunday night Mr. C. T. Hill suffered with a bad hemorrhage in the stomach which at first appeared very serious. Thursday Mr. Hill was resting nicely and appeared to be improving. It will be some time before he is able to be around again.

Threshing machines are working in all parts of the Irma district. Cutting except on some of the larger farms is about completed and with a few more weeks of the excellent weather we have enjoyed since harvest started, the 1928 crop will soon be all garnered. There appears to have been sufficient help as most of the farmers made early arrangements to secure their extra men before the harvest rush was on.

Most of the grain arriving at the local elevators has graded from 2 to 4, although when the later cut grain is threshed it is expected there will be some lower grades.

NEWS ITEMS FROM KINSELLA

Mr. and Mrs. Kennel and family arrived last week from overseas to spend some time with her mother Mrs. Jewett.

MCLAUGHLIN-BUICK 1929 MODEL

Women admirers are like'y to find the 1929 car one over which to wax enthusiastic. Not only in its style but in its ease of handling and its provision for the comfort of driver and passengers, the new car is noteworthy.

The refinements made in the driving compartment of the 1928 cars are now supplemented by additional changes which will appeal to women as well as to men. For example the car is now fully adaptable to the requirements of any individual. Its adjustable steering column, introduced last year is retained and the front in every closed model is now adjustable also. It may be shifted three and half inches to accommodate a driver of any stature. This adjustment is accomplished with one hand, by means of a small knob located just below the front edge of the seat cushion and can be made without disturbing either driver or passenger. The seat automatically locks in any one of seven positions within its range of adjustment.

Another refinement is the electric windshield wiper with tandem blades standard equipment on all closed models. Thistype of wiper not only maintains an even regardless of the engine speed but clears the entire windshield in front of the passenger as well as the driver. It is connected with the ignition switch in such a way that shutting off the engine stops the wiper, a provision which prevents discharging the battery through accidental failure to turn off the device when the engine is stopped.

Still another driving compartment is the new instrument panel with its new grouping of instruments. The panel is provided with two-way illumination and accommodates the 90 mile speedometer-directly in front of the driver, the oil gauge, water temperature gauge and the new hydrostatic gasoline gauge a simple application of an old principle of registering the height of the gasoline in the tank.

The gearshift lever in the new McLaughlin-Buick is of graceful design and curves back towards the driver. As in the 1928 car there is no control for which the driver must reach. Everything is within easy distance of hand or foot. Light controls are centralized on top of steering column as formerly with horn button.

Drivers accustomed to spend much time on the road will appreciate the new accelerator pedal and foot rest, which are so designed as to permit movement of the right foot while driving without affecting the speed of the car. The new front compartment ventilators - small doors in the cowl just forward with the front doors and on a level with the feet, also will appeal. They are operated easily by a slight pressure of the foot.

McLaughlin-Buick is introducing something new in the way of theft-resisting door handles in the 1929 lines. While a would be thief may force the handle with a wrench or piece of pipe it will give without allowing access to the car, and the owner may still unlock the door with his key.

A new and pleasing pattern has been worked out for the interior hard ware and improved robe and foot rails are provided in the rear compartment. Easier cushions wider rear seat and carpets and side-wall lining of high grade materials complete the most comfortable and luxurious ensemble McLaughlin-Buick has ever offered.

"I'm buying one of these new electric washing machines for my wife as a birthday present," remarked a local citizen to a friend on the street. "That will be a surprise, eh?" the other said. "Yes, quite," was the reply, "you see, she's expecting a car."

"Well, now what time do I have to start work mornings?" asked a young fellow from town who had taken a job on a farm. "Any time you like," replied the farmer, "just so it ain't later than half past four."

Heard in a local store: "I want a pair of garters, please." "Something like those you are wearing, I suppose?"
